*LJ university*

## SKILLS

---

- python
- Java
- HTML/CSS
- WORDPRESS
- SQL
- UI/UX

## PROJECTS

---

### Women Safety App

*Personal Project | UI/UX Design & Frontend Prototype*

- created an intuitive and user-friendly user interface and user experience for a mobile application aimed at promoting women's safety.
- Interactive app interfaces were created for functions including quick dial, location sharing, and emergency SOS. utilized Figma (or any other tool you choose) to create a sleek, contemporary prototype. centered on user-centric design, usability, and accessibility.

### GigFlow Homepage UI/UX Design

*Personal Project | UI/UX Design & Web Prototype*

- Designed an intuitive homepage layout for **GigFlow**, a freelance gig marketplace platform.
- Focused on a clean, responsive interface showcasing featured gigs, categories, and top-rated freelancers.
- Created a smooth user journey from homepage to gig posting and freelancer profiles.
- Developed a clickable prototype using Figma (or whichever tool you used), optimizing for both desktop and mobile.

### VirtueCard

*Personal Project | Figma Prototype*

- Designed a modern, responsive UI/UX for **VirtueCard**, a digital business card application.
- Created user-friendly layouts for adding and sharing contact information, social media links, and QR codes.
- Developed a complete interactive prototype in **Figma**, focusing on smooth user flows and mobile responsiveness.
- Prioritized minimalist design, ease of navigation, and cross-platform accessibility.
